# CBUAE — AML/CFT Guidelines for Financial Institutions (Synthetic)

**Regulator:** Central Bank of the UAE (CBUAE)
**Regulation ID:** REG-CBUAE-AML-2024
**Effective:** 2024-06-01
*Synthetic document for the ARGUS demo. Not a real circular.*

### Article 15 — Structuring and Smurfing

Financial institutions shall detect and report patterns of multiple cash deposits made below the cash transaction reporting (CTR) threshold of AED 55,000 where the pattern indicates an intent to evade reporting. Series of deposits by the same customer aggregating above the threshold within a short window must be escalated and filed.

### Article 22 — Customer Identity Integrity

A customer's identity must be unique and verified at onboarding. Reuse of the same national identity document, device, or contact number to open accounts — particularly across multiple institutions — is a red flag for synthetic-identity fraud and must be investigated.

### Article 31 — Money Mule Networks

Institutions must monitor for money mule activity, including rapid pass-through of funds, fan-in/fan-out account structures, and accounts that consolidate inflows from many unrelated parties before onward transfer.
